Southwestern to Construct New Facility in Posey County

(Evansville, IN – March 21, 2016) - Southwestern Behavioral Healthcare, Inc. (Southwestern) is excited to announce that a new facility for its Posey Regional Services will be built this spring and is expected to open mid-summer.

Southwestern currently has an office at 100 Vista Drive in Mt. Vernon, Indiana. This office has served as Southwestern's outpatient facility for mental health and addiction treatment in Posey County.

Southwestern will be constructing a new facility on land just one block off Fourth Street, which is a more centralized and accessible location for residents of this community. The new address for the Posey Regional Services offices will be 309 N. Sawmill Street.

With the investment of this new facility, Southwestern looks to accomplish having a more accessible location for the residents of Posey County and having a larger space to provide a greater amount of services.

"We plan to continue to provide quality mental health and addiction services in Posey County. Our goal is to provide evidence-based services to this region in a manner that is professional and convenient for those whom we are so privileged to serve. This new facility will allow us to grow as needed and look to the possibilities that lay ahead in the future," said Faren Levell, President/CEO of Southwestern Behavioral Healthcare.

The media is invited to a groundbreaking event on Thursday, March 24th at 11:00 a.m. This event will take place at the new site on 309 N. Sawmill Road. Representatives from Southwestern will be available for comment and if you are not able to attend, we would like to send you photos from the event to run in your local media outlet.

It is important to us at Southwestern that the communities we serve are well informed and aware of the services that are available to them in their own backyard. We hope that you will join us in spreading this important news to the residents of Posey County.
